Butler Ames established the Lowell Airport Corporation, which ran the Lowell Airport that was dedicated with a huge air meet in June of 1928.

Tickets to the Air-Meet and Exposition
Lowell’s Air Meet and Exposition—

Surely you will want to attend this history making event.

Even if the aviation part of it did not happen to appeal to you, the exposition of Lowell’s Industries and the exhibits of Lowell’s Merchants will be of sufficient interest to make it worth your while to attend.

Visit the Bon Marche Booths—We shall exhibit the newest household appliances—the New Ray Washer, the New Hoover Cleaner, the New Chambers Ironless Gas Range. There will be interesting demonstrations of each of these things. Miss Mildred Meers will show you how the Chambers Range can save half your gas bill.

See the New Radios—The outstanding achievement of the Radio world. Even newer than aviation—this Radio miracle, and of more immediate benefit to a greater number of people.
AMES TESTS AEROPLANE.
Engine Not Powerful Enough to Lift the Body.

LOWELL, Nov. 24—Another test of the aeroplane constructed by Congressman Butler Ames was made today on the links of the Longmeadow Golf Club.

Although the flying machine did not rise from the ground, the test, according to Congressman Ames, was satisfactory as it showed that the present engine is not sufficiently powerful. The speed attained today was 15 miles an hour, but 25 miles an hour is required, according to the inventor, to send the machine into the air.

The power part of the aeroplane worked very smoothly today, and Congressman Ames was much pleased with its performance.

The test was a private one, only members of the Ames family and one newspaper man being present.

Congressman Ames will at once begin the construction of a new and more powerful engine.
